SUMMARY

Computer Science student with a strong foundation in programming and software development. Built a web application project showcasing practical coding skills. Eager to apply knowledge in web development, software engineering, or related fields through an internship while gaining real-world industry exposure.

TECHNICAL SKILLS

- Languages: JavaScript, Python, Java, C, C#
- Frontend Development: React.js, HTML5, CSS3, Material-UI
- Backend Development: Node.js, Express.js
- Databases: MongoDB, MySQL
- Key Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Blockchain Technology, REST APIs
- Developer Tools: Git, GitHub, VS Code, Visual Studio, Postman

PROJECTS

Full-Stack QR Code Attendance System (Web App Developer)

Project Link: <https://github.com/Meet-1313/QR-Attendance-WebApp.git>

- Tech: React, Node.js, Express.js, MongoDB, Socket.IO, JWT, Material-UI
- Developed a complete teacher-facing web application to automate student attendance, including the backend API and frontend interface.
- Spearheaded the design of a secure RESTful API that served both the web platform and a cross-platform mobile app.
- Engineered a real-time dashboard using WebSockets (Socket.IO) and a dynamic, expiring QR code system secured by JWT for fraud prevention.
- Constructed a responsive UI with Material-UI, featuring data visualization charts and an automated email notification system for attendance reports.

Academic Project : Regression Model for Bike sharing demand predictor

- Tech Stack: Python, Pandas, Scikit-Learn, Matplotlib, Seaborn
- Developed a Regression Model to forecast hourly bike rental demand by analyzing historical usage patterns, weather conditions, and seasonal data.
- Conducted Exploratory Data Analysis (EDA) to identify key demand drivers, discovering high correlations between "feels-like" temperature and peak rental hours.
- Optimized the model using Random Forest Regression and evaluated performance using Root Mean Squared Logarithmic Error (RMSLE) to ensure high prediction accuracy.

EDUCATION

Sarvajanik College of Engineering & Technology | Surat, Gujarat
Bachelor of Technology in Computer Engineering | Expected May 2026

Relevant Coursework:

Data Structures & Algorithms, Operating Systems, Web Technologies, Database Management Systems, Software Engineering, Computer Networks.
